

DON'T STEP ASIDE

Itinual Rastafari blessings

The Global security of Rastafari people is of utmost importance .The duty call of organizing and centralizing along with collective security is a MUST

How much longer will InI take to seal up this? Why are so many Rastafari organizations and groups dragging their feet on this urgent matter?

Let's reason: Rastafari claim that they are a government within a government, meaning a government in exile –don't?

Now all government have defined ministerial portfolios -I can't name any so far that Rastafari have established.

All governments must have a constitution and set budgets. This also InI cannot boast. It is all good to say Theocratic Government Rastafari – yes I, a churchical order –indeed,

Let be known that religion is personal and many will have own interpretation of it.- InI will bear no malice with them even if they are , stuck in their religious groove and want to chant their way to Mt Zion.

Always remember that Ethiopia /Africa is a real world ,she will spew out the one who is not ready ,she will not tolerate the lazy ,the one looking for the hand out nor the one looking to exploit her natural resources ,and her people.

Qadamawi Haile Selassie told InI to send a pioneer group first, the fact finding mission was done in 1960's and still yet some heading there to do more fact finding –What is the deal ?

It is always a good reminder that faith without works is dead and since many Rastafari swear that they will have nothing to do with the dead, it is now works time, seen Fiya!

The duty is to move with haste or else Babylon wall will come crushing down .Not even the rock will find a hiding place – There will be no mercy for the merciless-only the righteous will stand.

There should be no mistrust in Rastafari –Why should there be? Are we not all not the children of the Most High Jah Rastafari, or some are still doubtful?

The Rastafari Global Secretariat is a stepping stone to Rastafari political governance –although I man hear the sound –Bun a politician!

InI is not about political tribalism or partisan politics –InI should be about the positive changes through sincere political efforts, which would to bring about real changes in Rastafari social welfare systems.

Heads of government are guilty of atrocities committed against Rastafari for decades –no appeasement should be accepted .Payment upfront is in order, Yes Iyah!

Migration is now being substituted for Repatriation and while the debate goes on the movement of Jah People will continue over land and sea and yet there must be accountability for ones trodding, who is mandated to do this?

The all mansion of Rastafari is struggling to get off the mark, there seems to be too much power play among big ego trippers. Many will stay wide of their domain as their struggle intensify to attract Global recognition.

The Rastafari Global Secretarial must closely be examined, and ones carefully chosen to provide leadership, there are so many ones who have great abilities and are not affiliated to any house or mansion.

I man being fully aware of the complexities of houses and mansions, the rule of Hymn book and bible, the position on colours of the emblem, the sound that every man/woman for him/herself, and Jah Rastafari for us all, along with the church and state dilemma which has created more division for the weak, and those seeking knowledge.

So Fiya Ingel, who is willing to move forward, must step up NOW! Qadamawi Haile Selassie states the following:

“In order to achieve this common goal of strength through progress, it becomes necessary for us to abandon once and for all, petty prejudices and artificial barriers that tends to perpetuate a state of division and confusion ---let us therefore leave aside all misguided aims and groundless ambitions that can only lead to wasteful time consuming conflicts.” Feb 20, 1964

Guidance and Itection
