

“Tell the people to come home. Here their Race originated and here it can be lifted to its highest plane of usefulness and honour.

Assure them of the cordiality with which I invite them back to the homeland particularly those qualified to help solve our big problem.”

HAILE SELASSIE I.

The Importance of Repatriation to African Development

Whereas Colonial Slavery has robbed every victims of all their African values and faculties;

Whereas this new imposing capitalistic economic system of Globalization is continuing the process of colonialism through monetary policies;

Whereas Globalization will further widen the gap between the richer European and poorer African countries unleashing the devastating spiral effects of poverty;

Whereas this new global environment will further traumatize African descendants into a new era of: victimization and marginalization, living on minimum wages/welfare, incarcerations, drug addictions, being shackled into ghetto slums, and criminality;

Whereas Africans in the diaspora are now faced with three (3) decisions for our survival:

- 1) Racial Integration into existing colonial infrastructures/ trade groups e.g. the E.U.
- 2) Racial Separation establishing an Afro-centric governmental system within these Colonial/Imperial governments
- 3) Racial Preservation by repatriating Africans to their original homeland

And **whereas** the judicial process of Reparations was never awarded to the victims of the African holocaust;

Whereas the present recourse by International law against humanity crimes for Human Trafficking requires each Abductees to be returned to their lawful homes with compensation;

It is my strongest believe that **racial preservation** will provide for us the best solutions for our survival against every form of neo-colonialism! What every African dispersed ethnic groups now needs to do is to replant their seeds on the shores of Africa to reverse the negative traumas of slavery with this inverted environmental shock treatment, and nurture it with Pan-Africanism; Pan-Africanism or perish! And let our seeds, our African villages grow hand in hand together.

Let Pan-Africanism nurture our villages into strong African towns. Then make our towns develop into strong cities; and from cities into our strong African Nation once again.....

We can start this process ourselves by letting the A.U. know that their children are coming home, NO VISAS REQUIRED! We are returning residents with a plan.

It is the same formula that the Hon. Marcus Garvey envisioned with the U.N.I.A. “back to Africa” mission; It is the formula that Emperor Haile Sellassie I tried to establish when He offered Jamaica membership state within the O.A.U. in 1966; It is the present demands by the Rastafari Nation for reparations against the atrocities of colonial slavery! And the victory of Reparations will ensure that our plans for a New Africa, be it the United States or whatever our Union may become, WILL NEVER FAIL! Blessed Love.
